Приложение PushNotificationMApp

Структура приложения

Логическая структура javascript-файлов

Получение идентификатора пользователя от Tizen Push Service

getRegId()

```
if (regId != null) {
     console.log("RegId already exists");
else {
    var service = new tizen.ApplicationControl("http://tizen.org/appcontrol/operation/push_test");
    tizen.push.registerService(service, registerSuccessCallback, errorCallback);
    function registerSuccessCallback(id)
         regId = id;
         console.log("Registration succeeded with id: " + id);
         $("#txt-reg-id").val(id);
         initServiceCallback();
    function errorCallback(e)
       console.log(e);
```

Регистрация пользователя

registerUser()

```
var nickname = $("#txt-nickname").val(),
         email = $("#txt-email").val(),
         regid = regId;
localStorage.setItem("my_email", email);
localStorage.setItem("my nickname", nickname);
var user = {
    "nickname": nickname,
    "email": email,
    "regid": regid
    };
$.ajax({
   type: "POST",
   url: "http://YOUR URL/userapp/register user/",
    data: user,
    success: function(response) {
        console.log(response);
        backToMainFromSettings();
    error: function(e) {
         console.log(e);
});
```

Получение списка пользователей

displayAvailableUsers()

```
$.ajax({
    type: "POST",
    url: "http://YOUR_URL/userapp/get_users",
    success: function(response) {
        console.log(response);
        showUsers(response);
    },
    error: function(e) {
        console.log(e);
    }
});
```

Отправка сообщения

sendMessage()

```
var msgText = $("#txt-message").val();
var msg = {
    "message": msgText,
    "sender": regId,
    "recipients": recipients.join(",")
    };
$.ajax({
    type: "POST",
   url: "http://YOUR_URL/userapp/send_message/",
   data: msg,
    success: function(response) {
        showMessage(localStorage.getItem("my_nickname"), msgText, true);
        console.log(response);
    },
    error: function(e) {
         console.log(e);
});
```
